EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Nathaniel T. Wallace (Reg. No.: 48,909) on July 18, 2006.

Please cancel claim 1 and amend claims 9-16 as follows:

1. (Cancelled)

In the claims:

- 9. (Currently Amended) The terminal according to claim 1 computer implemented method according to claim 19, wherein said parameter extensions field further includes a Parameter Separator and at least one Parameter.
- 10. (Currently Amended) The terminal computer implemented method according to claim 9, wherein said Parameter Separator in said parameter extensions field is a comma.
- 11. (Currently Amended) The terminal according to claim 1 computer implemented method according to claim 19, wherein the terminal transmits the TDMF message to the selected encoding is DTMF, and a destination terminal of said communications terminals is a non-H.323 device.

Application/Control Number: 09/761,136

Art Unit: 2144

12. (Currently Amended) The <u>computer-implemented method</u> according to claim 11, wherein said identifier field contains a Feature Tag and Feature Code.

- 13. (Currently Amended) The terminal computer implemented method according to claim 12, wherein said Feature Tag is limited to two characters for identifying said message as being DTMF String Encoded.
- 14. (Currently Amended) The terminal computer-implemented method according to claim 13, wherein said Feature Code is limited to six characters for identifying different classes of said supplementary services.
- 15. (Currently Amended) The terminal computer implemented method according to claim 14, wherein said parameter extensions field further includes a Parameter Separator and at least one Parameter.
- 16. (Currently Amended) The terminal computer-implemented method according to claim 15, wherein said ParameterSeperator is an asterisk.

Allowable Subject Matter

Claims 9-16 and 19-20 (renumbered 1-10) are allowed.

The following is an examiner's statement of reasons for allowance:

The inventive entity persuasively argued (see Applicant's Remark on Page 6, ¶3-4 and Page 7, ¶1) that none of the prior art of record taken singularly or in combination teaches or suggests a computer implemented method of encoding a PDU (Protocol Data Unit) in accordance with a protocol namely SSSP (Simple

Application/Control Number: 09/761,136

Art Unit: 2144

Supplementary Service Protocol) and transmitting the encoded PDU via a message over an existing H.323 protocol by making use of an alpha numeric string encoding for transmitting the message to an IP based communications and making use of DTMF (Dual Tone Multiple Frequency string encoding) encoding for transmitting the message for Dual Tone Multiple Frequency based network communications; the encoded PDU having therein an identifier field for identifying different functionally based supplementary services, the encoded PDU further comprising an end tag field for indicating message ending; the encoded PDU having therein a parameter extensions field separating the identifier field and the end tag field and communicating the message having a selected encoding format among communication terminals. The claimed limitations are enabled by the specification (Spec. Figs. 2·19, showing message flow using SSSP for plurality of additional supplementary services and encoding limitations on Page 6, Line 25 through Page 8, Line 14, and Page 17, Lines 5·18).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Yemane M. Gerezgiher whose telephone number

Page 5 Application/Control Number: 09/761,136
